

## Activity 03 – Arranging Multiple Documents

### Data Files

03.toy.jpg

03.dog.jpg

03.girl.jpg

03.cat.jpg

### Scenario

You want to look at a few of your images to determine if any of them would make an interesting composite if combined. By arranging them on the Photoshop workspace, you hope to get a sense of which, if any, have a similar feel or theme.

- 1) Open the following files in Photoshop: 03.toy.jpg, 03.dog.jpg, 03.girl.jpg, and 03.cat.jpg.
- 2) Set the screen mode to Full Screen Mode with Menu Bar.
- 3) Float all the images and drag to rearrange them so that a portion of each one is visible.
- 4) Tile all the images vertically.
- 5) Tile 4-Up.
- 6) Close the toy.jpg file.
- 7) Change the arrangement of the three remaining images by dragging and placing them on the workspace as desired.
- 8) Consolidate all back to tabs and then close the girl.jpg file.
- 9) View the remaining two images side by side to determine whether or not they would provide an interesting composite if combined.
- 10) Close all files.
